Education

University of Waterloo, PhD in Computer Science — Sept 2024 – Present

- GPA: 94%
- **Coursework:** Human-AI Interaction, Art in Human-Computer Interaction, Reinforcement Learning, Programming Languages
- **Scholarships:** Eurohaptics Research Travel Grant, Mitacs Globalink Research Fellowship, International Doctoral Student Award

Experience

Visiting Researcher, Inria Paris-Saclay — Jan 2026 – Mar 2026

- Iterated on prototypes for a computer mouse with vibrotactile and thermal feedback, intended to support situational awareness in control rooms.
- Conducted co-design sessions with SIAAP Seine-Aval employees.
- Developing a lab-controlled abstract task to evaluate prototype design compared to existing, visual-only systems.

Research Assistant, HCI Games Group, University of Waterloo — May 2021 – Aug 2021

- Developed VR scene prototypes and helped with data analysis pipelines.
- Designed experiments comparing users' behaviour in allocentric vs. egocentric VR perspectives.
- This work was published at IEEE VR '25.

Publications

Vibes on Demand: Adding Vibrotactile Encoding to Line Charts Shows Experiential Benefits Without Performance Costs — Nov 2026

Anchit Mishra, Oliver Schneider, Matthew Brehmer

IEEE Transactions on Visualization and Computer Graphics, Proc. VIS 2026, 1-11. 10.48550/arXiv.2608.15307

TacTalk: Personalizing Haptics Through Conversation — Jul 2025

Anchit Mishra, Oliver Schneider

Proceedings of the ACM Conference on Conversational User Interfaces, 1-19. 10.1145/3719160.3736638

Seeing is Not Thinking: Testing Capabilities of VR to Promote Perspective-Taking (best paper at IEEE VR '25) — May 2025

Eugene Kukshinov, Federica Gini, ***Anchit Mishra***, Nicholas Bowman, Brendan Rooney, Lennart E. Nacke

IEEE Transactions on Visualization and Computer Graphics, 2694-2703. 10.1109/TVCG.2025.3549137

Measuring Incompatibility And Clustering Quantum Observables with a Quantum Switch — Apr 2023

Ning Gao, Dantong Li, ***Anchit Mishra***, Junchen Yan, Kyrylo Simonov, Giulio Chiribella

Physical review letters 130 (17), 170201. 10.1145/3719160.3736638

Projects

F1 Race Visualization — GitHub Repo

- Implemented a visualization tool for Formula 1 races, rendering telemetry data to vibrations on iOS.
- Tools Used: React Native, Core Haptics (iOS)

Jalashaya Fluid Solver — GitHub Repo

- Implemented a simple PIC/FLIP fluid solverusing the Gauss-Seidel method.
- Tools Used: C++, Eigen
